Medistri SA Certified as a Corporate Citizenship - Medistri

Medistri SA Certified as a “Entreprise Citoyenne”

At Medistri, we believe our commitments are both ambitious and necessary. To achieve our objectives, we focus on scalable innovation. Designing and implementing new technologies, mobilising financing structures, and rapidly deploying renewable energy.

The “Entreprise Citoyenne TM” label is awarded on the basis of prior certification to ISO 9001 (quality management system) and ISO 14001 (environmental management system) standards. A “Entreprise Citoyenne” is one that takes social and environmental considerations into account in its activities and in its relations. It is therefore an organization whose economic, environmental and social goals coexist, while demonstrating that the pursuit of financial profit is not its sole objective.

👉 Carrying the label enables differentiation and better positioning, while guaranteeing consumers of the company's commitment to sustainable development and continuous improvement.

Here's the steps that Medistri followed in order to obtain the “Entreprise Citoyenne TM” certificate:

- Implementation of the various management systems (ISO 9001, ISO 14001).
- Initial certification audit by an accredited organization. The audit verifies that the organization meets the criteria of the “Entreprise Citoyenne TM” Label.
- Formulation of an audit report outlining potential areas for improvement.
- Certification by “Entreprise Citoyenne TM” and obtaining the right to use the label's logo.
- Audits carried out at regular intervals as part of an annual monitoring program.

ISO 9001: ISO 9001 is a globally recognized standard for quality management. It helps organizations of all sizes and sectors to improve their performance, meet customer expectations, and demonstrate their commitment to quality. The standard provides guidelines for establishing, implementing, maintaining, and continually improving a quality management system (QMS). Implementing ISO 9001 means that an organization has established effective processes and trained its personnel to systematically provide quality products or services.

ISO 14001: ISO 14001 is an internationally recognized standard for environmental management systems (EMS). It provides a framework for organizations to design and implement an EMS and continually improve their environmental performance. By adopting this standard, organizations can ensure that they are taking proactive measures to reduce their environmental footprint, comply with existing legal requirements, and achieve their environmental objectives. The framework provided by this standard covers various aspects, from resource use and waste management to monitoring environmental performance and involving stakeholders in environmental commitments.

Medistri is the largest independent sterilisation company in Europe and its mission is to facilitate innovation in the global health sector. Since its foundation in 2006, the company has continued to grow into one of the leading providers of contract sterilization & laboratory services for healthcare companies. Medistri has grown to become a dependable partner for businesses in the pharmaceutical, medical device, aerospace, and biotechnology sectors.

📍 Medistri's headquarters are located in Domdidier, Switzerland. For more information, please visit www.medistri.swiss or contact contact@medistri.swiss.
